Professional Summary

I am a dedicated React developer with a BS in computer science and experience working in front-end development. My expertise includes designing and coding great user interfaces using React.js, JavaScript, CSS, and HTML. I thrive in labs, manage current projects, and understand basic UI/UX concepts. I have a strong understanding of modern front-end tools like Webpack, Redux, and Enzyme, ensuring efficient delivery and effective project management. My strong problem-solving skills and commitment to excellence fuel my success in delivering quality web applications.

Employment History

Associate Software Engineer, Qor (formally Bitscape) Pvt Ltd, Mehsana

02/2023 - 02/2024

- Designed and developed applications using Power Apps, Power Automate, and Power BI, enhancing operations and user experience.
- Customized Dynamics 365 solutions and integrated ReactJS products to boost efficiency and performance.
- Utilized Django fundamentals for improved web development.
- Enhanced application performance through AI-driven capabilities with OpenAI.
- Collaborated with cross-functional teams, maintaining detailed records to ensure timely project completion.

Lecturer and Software Guide, Gujarat Technological University, Gujarat

02/2024 - Till Now

- Instruct web development courses, emphasizing tools such as HTML, CSS, ReactJS, and Django.
- Guide students in creating websites and applications, while facilitating hands-on lab sessions with databases like MongoDB and SQL Server.
- Equip students with coding skills and real-world project experience.

Education

Bachelor of Computer Science, Shri Sharvajanik Vidhyalay, Gujarat

Majors: Computer Engineering

Training Program, Gujrat Power Engineering and Research Institute, Gujarat

08/2022 - 08/2022

Completed the Android development training course and gained experience working with Android Studio and Java. Enhanced Android applications development skills and developed detailed specifications as per the Software Development Life Cycle (SDLC) process.

Projects

Portfolio Website, React JS

I have created a dynamic portfolio website with interactive content and engaging animations using React.js. The website enhances my products with advanced UI/UX features, providing flawless functionality and a great customer experience.

Personal Blog Website, ReactJS + Django

I have created a personal blog site using Django as the backend and database support and combined with React.js as the dynamic frontend. The website is designed with advanced HTML and CSS to provide a rich and engaging user experience.

Leave Request System, ReactJS + ExpressJS + SQL

I created a Leave Request System using ReactJS for the frontend, ExpressJS for the backend, and SQL for database management. The system streamlines leave requests with a user-friendly interface and robust backend processing.

Job Portal, ReactJS + ExpressJS + MongoDB

I developed a job portal using ReactJS for the frontend, ExpressJS for the backend, and MongoDB for database management. This job-finding app provides a seamless platform for users to search and apply for jobs, featuring an intuitive interface and efficient backend processing.
